

# AMPLIROLL® HIGH OPTIONS

## HYDRAULIC LINE FOR REAR TIPPER ON REMOVABLE BODY PRODUCTIVITY & VERSATILITY FOR EVERYDAY USE

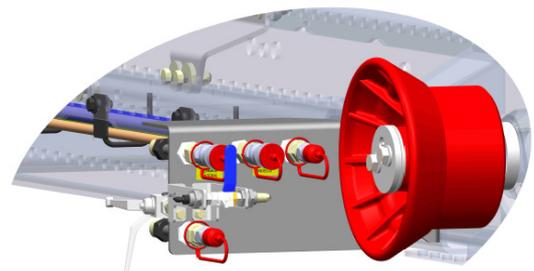

Control a 2 or 3 hydraulic functions rear tipper on removable body from the distribution unit of the Ampliroll®. The operator selects the bypass circuit and controls the movement to be used from the cab (via a 2-lever pneumatic control box).

AMPLI'DRIVE		
START	OPTI	PRO
VAL056051S (2 functions)		
VAL056053S (3 functions)		

The option includes the installation of a 2- or 3-function distribution unit with 4 pressure limiters incorporating a flow control valve on a support located in front of the side box.

The rear plate and hoses are supplied ready for installation by the dealer (couplings are not supplied).

### KEY POINTS

#### PRODUCTIVITY

Direct control of a rear tipper on removable body from the distribution unit installed on the Ampliroll®

#### VERSATILITY

Two equipment monitored by separate controls
